ARMY AIR FORCES
TECHNICAL TRAINING COMMAND

Dear Folks:-

We didn't get up in time to go to chow so I'm plenty hungry + we don't eat till about 1:00. We're fun cleaning the barracks this morning. The guy who slept above me + I washed an inside window + a storm window. Remember how much work it took to get one to do it at home? It sure brings back memories. What doesn't. I hear guys talk every day about being in the army for 10-20 mo. + haven't had a furlough yet!! I hope I get one before I go across!!

We found out a little more about the school here around here. We go to school from 10:30 p.m. till 6:00 a.m. have 2 hrs. of calisthenics,

then chow (supper at about 8:30 a.m.) study till noon, + then sleep till 8 p.m., + have about 2 hrs. to write letters + study some more. I hope I have time to write letters because I plan to do plenty of studying. Dale, I know this an plenty of physics can needed with this school + I should had a bit of it. Could better take my advice + take it. I can need know when you'll need it.

We really had a swell meal last night. My first roast beef + mashed potatoes + gravy since Sept 15th is the army, green beans, bread + butter, bread pudding, pumpkin pie, milk, coffee, + cabbage (all which I ate some of), + potato soup. Not bad, eh? But still not like the food mother cooks!!

ARMY AIR FORCES
TECHNICAL TRAINING COMMAND

I wrote quite a few letters yesterday after we finished with cleaning out the latrine. It wasn't a bad job at all. I wrote that man in Toledo, Madine Putman, & of course you guys & Ruth. I also sent out some letters I want to do yet & Ruth & one to Bob Spry. Maybe on the train. If I have enough time this afternoon & plan to write some more I owe. Punkie, Mrs. Sears, Aunt Cleo, Aunt Edith, Virginia Hyde, Bryson Cook, & some others I don't think of right now.

Boy I'm hungry.

As soon as you find out where Gordon, Bob, Jim, Ted, Clarence, & some of the rest of the boys are & what their addresses are, let me know.

I sure hated being separated from them all but I'm with a swell bunch of guys here.

It started to snow a little yesterday but is gone now & it isn't awfully cold out. We wear our overcoats tho' & really appreciate them.

My sunburn is really peeling but it'll still be plenty brown after it's peeled. I noticed it when I took my first ~~[illegible]~~ shower since I was in the Azores months. It sure felt swell. I guess I'm going to have to work out some as I'm getting quick. We aren't allowed to send stuff & the laundry till next week. I'm sure gotta brass to send. They take it out of my pay so I can send it now. I'm still "rolling my own" & don't mind it at all. Well I guess that's all for now.

Love Glenn
